

The appreciative Leader

People who feel appreciated at work are 89% more likely to work harder. On the flip side, 66% of the people who feel unappreciated are likely to change their jobs. Appreciative leaders nurture, empower and retain their employees. In this workshop, Avi Liran unveils the transformative power of effective appreciation in leadership. It's a blueprint for building a positive workplace where appreciation is the key to unlocking potential and fostering a thriving organisational culture, as well as attracting and keeping great talent.
